Riteesh Thiruveedhula

Hyderabad, Telangana, India | +91 9849901104 | riteesh.vnsp@gmail.com | linkedin.com/in/riteesh2k6 | github.com/Riteesh-2k6

Education

B.Tech, Computer Science and Engineering (AI & Machine Learning) **2023 - 2027**
KG Reddy College of Engineering and Technology, Hyderabad *Hyderabad*
- **GPA:** 9.44/10
- **Coursework:** Data Structures, Algorithms, Operating Systems, Database Management Systems, Computer Networks, Machine Learning, Deep Learning, Statistics, Probability

Experience

Mondee Tech Pvt. Ltd. **Aug 2026 - Present**
AI Intern
- Contributed to AI-powered software solutions by developing Python-based backend modules and collaborating with cross-functional engineering teams, improving development efficiency through structured implementation and testing.
- Assisted in software analysis, documentation, debugging, and code reviews while following enterprise software engineering practices in an agile environment.

Lakshya Smart Guard Systems **Jun 2026 - Jul 2026**
Developer Intern
- Developed responsive drone management dashboards using React.js, JavaScript, Python, and REST APIs, enabling real-time monitoring and operational insights.
- Integrated OCR and machine learning-based analytics into software workflows, reducing manual data processing while improving usability and decision-making.
- Optimized backend APIs and application performance through debugging and feature enhancements, contributing to scalable software delivery in an agile environment.

Swecha Telangana **Jul 2025 - Sep 2025**
Tech Lead Intern
- Led an 8-member team to curate and validate 50,000+ Telugu text samples for Indic LLM and NLP research.
- Established annotation standards and mentored contributors, improving dataset quality and delivery across multiple releases while supporting language data preparation for AI applications.

PROJECTS

BeyondML – Autonomous AutoML Platform
- Built an AutoML platform automating data preprocessing, feature engineering, model training, evaluation, and SHAP-based explainability, reducing model development effort by over 70%.
- Implemented and benchmarked 10+ machine learning algorithms through an interactive Streamlit interface, enabling rapid experimentation and transparent comparison of model performance.
- Designed a modular ML pipeline capable of processing diverse tabular datasets with one-click training, improving experimentation speed by approximately 3×.

DeepHire – AI Mock Interview Platform
- Developed an AI-powered mock interview platform featuring adaptive interviews, LLM-based answer evaluation, and downloadable performance reports.
- Designed scalable backend APIs and workflows to support interview management, performance analytics, and personalized feedback generation.
- Integrated Groq-powered LLM inference to generate role-specific interview questions and detailed feedback, reducing manual evaluation time by over 80%.

Chiron – AI Healthcare Companion
- Led development of an AI healthcare assistant integrating symptom analysis, drug interaction prediction, and nearby hospital recommendations.
- Delivered a functional prototype within a 24-hour hackathon through rapid backend integration and AI workflow development.
- Built a modular decision-support pipeline combining multiple AI services into a unified interface, enabling faster medical guidance and improving user accessibility.

Skills

Languages: Python, Java, C++, JavaScript, SQL
Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Frameworks: React.js, Flask, Django, PyTorch, Scikit-learn
AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, RAG
Tools: Git, GitHub, Linux, PostgreSQL, MySQL, NoSQL Databases, AWS

Publications
